

Webinar GeoUS

We are pleased to announce that our team has launched another Webinar within project GeoUS (Geothermal Energy in Special Underground Structures). The webinar will take place on **Tuesday August 30th 2022 at 9:00.**

The webinar on topic "Data management" will be led by **Dieter Weise** scientist at Fraunhofer IWU Chemnitz in the Sheet Metal Forming and Basics department in cooperation with **Vanessa Jekel** - Data Protection and Information Security Officer and Administrative Systems in Fraunhofer.

"Data management"

This lecture will discuss basics on the topic of data protection. This is followed by an insight into Fraunhofer's principles and concepts in this area. Or how Fraunhofer pragmatically combines data protection and efficient project processing.

Content includes:

1. Introduction (Dieter Weise)
2. Data protection-compliant corporate governance @ Fraunhofer (Vanessa Jekel)
Here, the basics on the topic of data protection are first presented and discussed. Insight into Fraunhofer's principles and concepts in this area. Since data protection can also be a hurdle in project processing, this area of conflict is specifically addressed and it is presented how Fraunhofer pragmatically combines data protection and efficient project processing.
3. Data management @ Fraunhofer IWU (Dieter Weise)
A brief insight into the Fraunhofer IWU's data management concept and how it is implemented in practice is given.
4. Conclusion.
